

Note about Westerville Virtual Academy Print Resources

July 31, 2020

Some parents who registered their children for WVA have inquired about obtaining the Calvert Learning System print resources for their children. Repeatedly, Calvert representatives have informed us that the print resources are not needed, and that all content that children need can be readily accessed and is available within their platform. Therefore, parents should neither feel obligated nor are short changing their child(ren) in the purchase of these print resources.

The cost for parents wishing to purchase the Calvert print materials is \$695 per grade level - there is no mark-up from the Westerville City Schools.

Please find attached a complete listing by grade level of the Calvert print materials. We will be offering an opportunity for parents to come in and examine these materials in the near future prior to purchase ... more information on this to come.

Also attached is the Calvert Learning supply list for each grade level. We will be reviewing these items and examining ways to provide some of the more non-household items in the coming days. As a reminder, there are no school fees as part of the WVA.

For now, thank you for your continued patience as we navigate together through establishing what we feel is a great learning opportunity despite all that is occurring around us.

Dr. Scott Ebbrecht

Director of Assessment and Alternative Education Services
