Dear WCSD Families:

As COVID-19 (coronavirus) continues to dominate the news cycle, and with precautionary measures being taken that are impacting events around the world, including some right here in central Ohio, we know that our families are thinking about the impact to our schools and their children.

Please know that we continue to monitor coronavirus developments daily. We are in touch with and regularly review information from the Franklin County and Delaware County health departments, the Ohio Department of Health, the Ohio Department of Education, and Centers for Disease Control and Prevention. We will be following their guidance on this matter. Our crisis manual is updated regularly to reflect current best practices and includes a section on pandemics, as well as other medical emergencies, to help guide our response in the event the virus is discovered and impacts us locally.

As part of their normal protocol during cold and flu season, school nurses have been monitoring the overall health of their school populations. They are also reminding staff and students of proven practices to stay healthy. As compared to other cold and flu seasons, our nurses have seen nothing out of the ordinary. However, they have been instructed to immediately contact district leadership if they identify a spike in illnesses or receive notice of a suspected case of coronavirus.

Our custodial staff continues its routine practice of cleaning schools daily to help prevent the spread of disease and common ailments such as the flu. Custodians are supplied with cleaning products that are proven to kill viral and bacterial strains of various diseases. Our custodial office also monitors attendance rates. Should a school's student attendance fall below 90%, our standard practice is to perform an immediate deep cleaning of that facility using additional tools and products for this purpose.

As you know, one of our primary goals is to maintain safe and healthy school communities. At this time, the various health authorities with which the district partners have not called for additional protocols beyond those which we follow as a course of normal operations. We are in touch with the health agencies mentioned above and anticipate their coordinated guidance in the near future regarding district-sponsored travel that our students may be participating in over spring break and at other times.

We encourage you to become familiar with the possible signs of the flu or other illness, and to seek immediate medical attention if anyone begins exhibiting any of those symptoms. While there are no confirmed cases in our state at this time, information about the coronavirus in Ohio, as well as tips to remain healthy, can be found online at <http://www.coronavirus.ohio.gov>.

Finally, please contact your child's school as soon as you become aware of any physician-confirmed contagious infection of your child(ren) so the school can take appropriate preventative measures. We will keep our families informed and share any additional updates as necessary.

Sincerely,

Dr. John R. Kellogg
Superintendent
